

ONIX

ONIX

Onix is available in 3 variety of versions like delicatessen and dairy products (DL), fresh meat (MT) and fruit & vegetables (FV).

It is possible to customize each Onix to suit your specific store colours or to meet your own product led requirements for merchandising. Options include, cabinet exteriors and interiors in any RAL colour, many end wall combinations covering colour, mirror and glazing, profit shelving, controllers through to full cabinet branding.

The Onix Slim is designed as a slim cabinet specifically for retail areas where space is a premium. Sharing the low front height of 325mm with the Standard Onix due to the reduced case depth of 750mm, the Slim is able to be placed in many areas where a normal size cabinet would not. Available in heights 2050mm and 2200mm.
